John I. McFarland Announces Additions to Unity Council

Five additions to the Provisional Unity Council, first meeting of which body has been called for June 23-24 in Edmonton, are announced by John I. McFarland, Calgary, chairman.

All of the new Council members represent the farming interests of the Province and include:

Charles P. Hayes, Strome, mixed farmer, municipal district reeve and for many years an active participant in provincial farm movement.

Alfred E. Honner, Etzikom, farmer-rancher, served overseas with 50th Battalion, formerly secretary-

treasurer of his municipal district. Mr. Honner was elected to the provisional Council by the directors of the Cypress Constituency Association, the first body to take such action.

Carl Antonson, Pibroch, farmer, president Pibroch Board of Trade; president Pibroch district Co-operative Association; municipal district councillor and long identified with farmer organization in the province.

William Redd, Raymond, farmer, sugar beet grower and cattle feeder; an active participant in farm co-operative activities in the southern part of the province.

Torgier Johnson, Loyalist, farmer or many years actively identified with the co-operative marketing movement.

Sports and Entertainment Committees Hold Interesting Meetings

The Sports and Entertainment committees of the Crossfield and District Board of Trade have met on several occasions and are busy making arrangements for the Sports Day, July 1st. They are endeavouring to make this an outstanding event and one of interest to the people of the district.

It is hoped that all who can be in Crossfield will render their support, thus assisting the sponsors in bringing a good time to all.

Mr. W. Fenwick Crossfield Oldtimer Passes Tuesday

W. Fenwick quietly passed away at his home, five miles south west of Crossfield, at the age of 77 years, after an illness of four months.

The late Mr. Fenwick was born at Felton, Northumberland, England, in April 1861. He came to Canada in 1911 and settled in the Crossfield district a short time later, retiring two years ago.

He leaves to mourn his loss, his wife, two daughters, Mrs. Hughes, Calgary, and Mrs. Bartlett, Blairmore, three sons, Harry and Arthur at home and William at Springbank. Four grandchildren, Victor Law, Crossfield, Cecil Law, Somerset England; Ivy Hughes, Calgary; Billy Fenwick, Springbank.

Funeral services will be held tomorrow (Thursday) at 2:30 p.m. from the Anglican church with the Rev. A. D. Currie officiating. The pallbearers will be, Messrs. S. Willis, F. Purvis, G. Murdoch, F. Colligan, E. Gilson and W. Cross. A. M. Shaver, Calgary, has charge of the arrangements, and interment will be made in the Crossfield cemetery.

May Yet Route North Highway Near Didsbury

Hope that the new north highway might be rerouted to pass the boundary of Didsbury rather than go two miles from it was renewed Tuesday. Hon. W. A. Fallow, minister of public works, Deputy Minister Monkman and Engineer McPherson met a committee of Didsbury citizens and went over the territory of the desired route.

After a survey of the route, Mr. Fallow told the committee he would stop the purchase of land on the route two miles east of town, and would put the engineers at work surveying the road along the boundary of the town.

The visit of the minister and the deputy followed a visit of a delegation consisting of John E. Gooder, and M. Weber, representing the Didsbury Board of Trade, to Edmonton on June 8, when they interviewed Premier Aberhart and presented a petition bearing 960 names, asking that the highway be brought through the town or along its east edge. Mr. Aberhart promised that the matter would be re-opened and an investigation made.

Since surveyors began work on the proposed highway route and there were rumours that the new highway would miss the town, residents have been carrying on a campaign to have the highway pass at least on the boundary of the town, if not down the main street. Hopes seemed doomed to disappointment when announcement was made by the Department of Public works several weeks ago that the route would be two miles east of the town.—Calgary Herald.

Construction of New Highway Commences North of Crossfield

Construction of the new number one highway between Calgary and Edmonton begins this week. The camp for the section between Carstairs and Crossfield is situated north of Wessex, about seven miles north of Crossfield.

The telephone line is being moved and fences have been taken down so as to make the highway wider. Nearby farmers will supply teams and, with the assistance of Diesel tractors, elevating grader, dump wagons, and Fresno outfits, with about seventy-five men employed for this camp, the highway will be the scene of action.

A. Tetley, of Calgary is the foreman. Once again prosperity looms up before the local unemployed.

More Improvements.

The Rectory has received a coat of paint, the work done by J. Chalmers.

Any of the congregation and others who would like to contribute to this worthy work, please see the Rector or either of the Wardens; Messrs. Sefton and Tredaway. The smallest contribution gratefully accepted.

J. T. Davis has completed the painting of his house.

This is a great asset to our town, and if others would do the same, Crossfield would soon be one big beauty spot.

J. Chalmers, assisted by Fred Becker, has given the Masonic Hall one coat of paint, another to be applied soon.

The park is taking on new beauty. Under the direction of Councillor C. Annsen, the quick grass is dug away from the hedges and a general clean-up made. W. Kustner is doing the work.

F. Hopper has charge of the cutting of the grass and dandelions.

M. Patmore has lengthened his garage, enabling him to have all his trucks and cars under cover.

The front of the Oliver Cafe has been painted, and the signs have been touched up with paint. A new sign has been erected on the front.

Two signs have been added to the windows of the Home. One for the Cafe, and another for the Meat Market and Groceries.

The street on the west side of the park has been made broader and Mr. Hopper has been employed to level it. Thus making it more passable.

Messrs. G. Murdoch and T. Mair had the Municipal grader on main street last Friday, giving it the once-over.

Our tennis courts have been put in first-class condition, so that any one wishing to play will be assured of the best.

Last weekend a bee was formed for the mowing, etc., of the grass at the Masonic Hall. Men were busy making the yard look bright.

J. Chalmers, with the assistance of Fred Becker, finished painting of the hall itself, and now it looks bright and cheery.

The bee, which had been arranged for last Wednesday, was busy this Wednesday. The C.P.R. plot was plowed and trees were planted. Men were at work, following the plow, holding Fresnoes, and doing all possible to make the plot into a beauty spot.

It has been planned to complete the replanting, etc., of the plot this summer, which will be a great asset to our town.

Confirmation Service at Anglican Church

A large congregation turned out to see the Bishop confirm five candidates and listen to his address. The following received the laying on of hands: Dorothy Knowles, Mary Collins, Winnie Tredaway, Edna Tredaway and Irene Sefton.

The Junior W. A. are closing for the summer months with a party on Monday next at 5:30 p.m., at the Rectory. Although they have only been working for a short time, the Juniors have been successful in raising their apportionment for the missionary work of the church, as well as dressing six dolls and donating six face towels with accessories to the dorkas work.

Local W.A. Ladies Attend the Annual Conference at Olds

The annual conference of the Red Deer Presbyterian Women's Association, the United Church Ladies Aids between Red Deer and Crossfield, was held Friday last, June 10th, in the Olds United Church.

Several carloads from Crossfield attended the conference, namely, Mrs. H. R. Ballam, who was President of the association last year, Mrs. J. P. Metherell, who was Secretary last year; Mrs. P. H. Fleming; Mr. and Mrs. M. N. Jones Rev. and Mrs. S. R. Hunt; Mrs. J. Belshaw; Mrs. E. W. Hoover; Mrs. F. Purvis, Mr. and Mrs. E. Fox; Mrs. C. Fox and Mrs. W. R. Emerson.

New officers have been installed for the ensuing year.

The Curse Of Education

"The best things in life are not given a percentage."

The foregoing is just a small extract from a speech made to a class of graduating Normal School students by Dr. J. S. Thomson, president of the University of Saskatchewan, to give point to a protest which he uttered against the school system of examinations as it exists in Canada and which he appropriately described as "a curse".

It is indeed gratifying to find leaders of education in the Western provinces voicing such a viewpoint on the inelastic method of categorizing school students—a pigeon-holing them under valuations elicited as a result of the application of a rule-of-thumb system of examinations.

As Dr. Thomson said: The grading of A's, B's and C's, and this multiplication of credits until students don't know where they are, "leaves no little place for all the noble things in life that can never be put in terms of percentage."

While the press report of Dr. Thomson's address did not enumerate those noble things towards which the student mind should be guided, it is not difficult to enumerate them and they can all be incorporated in the single-term "good citizenship", provided the definition of that phrase is made to include all that it should designate.

Good Citizenship

And good citizenship means much more than interest in government, in community affairs, in neighborhood welfare and the like. It involves the development of good sportsmanship, unselfish interest in the welfare of others and the will to recognize and place human values above material considerations and the advancement of moral and spiritual welfare.

It is because these things are, and should be, the ultimate goal of the educational system that the personality and character of the teacher should be the ranking qualification; for, as the teacher is, and not as the teacher says, so will the pupil be during the formative years of the child's career.

The teacher is destined to implant an unconscious and ineradicable mark on the mind of the impressionable youth under his or her care.

The value of the teacher to the children, to the community and the nation should be measured in terms of character and integrity rather than in brilliance of erudition. A teacher of strong individuality and mediocre academic attainments is worth immeasurably more to the future generation than one who is superlatively clever but lacks the attributes which inspire respect and admiration. The teacher who combines both is a jewel indeed and for such, adequate compensation cannot be measured in dollars and cents.

In the tuition of those things which Dr. Thomson says, cannot be registered in percentages, an ounce of practice is worth a ton of precept, to paraphrase a time-honored saying. The teacher who renders only lip service to the noble things in life is not worth his or her salt when the yardstick of real values is applied, but the teacher who is a living example of the aspirations which he or she holds up to the pupils as the lodestars of their careers is a pearl of great price.

While the teacher may have to conform, through regulatory control, to the examination system in greater or less degree, he or she will perform his or her greatest and most valuable work when moulding children into future citizens with ambitions to reach for the highest and best that life can give, not in material terms, but in the moral and spiritual realms, and this can only be done by the influence of example.

A Permanent Influence

The teacher who plays the game of life on the basis of the highest rules will exert an influence for good on his or her charges that will never be extinguished through time, and, fortunate, indeed, is the child whose future destiny is placed in such competent and reliable hands.

Nor will that impelling force die with the passing of the teacher's charges. It will be passed on from generation to generation. Like the ripple made in the water by the cast stone or the impulse surging through the ether from a radio and amplifier, no one may say how far it will go or measure the extent of its ultimate effect.

The teachers about to embark on their difficult and highly responsible task of laying the foundation for a new and better nationhood were urged by Dr. Thomson to set before themselves three standards, or, as he called them, "attitudes of life": the absolute worth of the individual human being, the building of character and the value of citizenship, and pointed out the importance of selflessness with the appropriate comment that "the way to be unhappy is to fall in love with yourself."

Excellent advice which, if it falls on receptive ground, is bound to yield rich dividends to the country in the future.

Yields Another Treasure

Gold Coins in House

The old house at 32 St. James Street, Montreal, Quebec, where wrecking crews found a \$90,000 treasure in gold Louis, has yielded another and richer hidden hoard.

Workers broke down a new section of wall and brought to light a leather and cloth bag packed with ancient gold pieces. Although an estimate of the worth of the new find was not immediately available, officials said it was greater than \$90,000.

The currency found first had been buried by Louis Nivelle, King Louis's quarry, to his niece, Anne Louise Claude Nivelle, according to the testamentary document found then.

Hotel Guest: "Is there an Encyclopedia Britannica in the hotel?" Clerk (with polite attention and regret): "There is not, sir; but what is it you wish to know?"

Brain Waves

Specialists Find That Electric Current Flows From The Brain

New light on the human brain, in the form of low-voltage waves of direct electric current flowing from grey matter was discussed by the American Psychiatric Association at San Francisco.

This direct current is positive during the conscious state and negative in unconsciousness and apparently the forerunner of death when it lasts too long.

Its discovery amazed the brain specialists for two reasons. The brain gives off the direct current almost continuously with alternating current. One wave of the direct current lasts 10 to 30 minutes while the "A.C." pulsates at an average of 10 a second.

Aversion to using their hands for carrying anything is so strong among the native women of Paramaribo, Dutch Guiana, that they even put letters on their heads, weighing them down with a brick.

A baker has written his will on a biscuit. It is to be hoped that after the lawyers have had their nibble there will be a few crumbs left for the legatees.

Not Good Publicity

Successes In Canada Not Stressed As Much As Failures

"Canada," said Lord Tweedsmuir to the visiting Scottish farmers the other day, "gets rotten publicity: too much for the failures and too little for the successes." There is much truth in that remark, states the Ottawa Journal.

The world knows about our Western drought, the problem of our railways, but much less about our social accomplishments. Perhaps the world does not realize that this small population in half a century has made a nation out of scattered settlements, has made a good start in the development of rich natural resources, is one of the foremost trading countries on earth. Sometimes in the face of immediate difficulties we fail to bear these facts in mind even among ourselves.

The trouble is that our accomplishments go into the blue books, but our difficulties are news and our successes are not sufficiently understood abroad. Perhaps it isn't news, but it is a fact of its importance that alongside an English-speaking nation of 130 millions we have preserved and developed a British colony, solidly devoted to the British tradition. The progress of agriculture, of industry, of mining may not be news as drought is news, but that progress has been a vital factor in world history of the past half century.

There isn't much we can do in the matter, of course. We shall just have to carry on in the knowledge that even in the United States many people still believe Canada a place of perpetual ice and snow inhabited mainly by Eskimo and Mounted Police, but we need have no inferiority complex on that account.

Prime Ministers

Sixteen Ministers And Eleven Premiers In Canada Since Confederation

During the 71 years since Confederation there have been 16 Ministers and there have been 11 Prime Ministers in Canada. In the 34 years, up to 1901, there were seven Prime Ministers and in the 37 since then only four have been added to the list says "Canada's Weekly".

The most frequent changes in Premier came after the death of Sir John A. Macdonald in 1891. Between that year and 1896 there were five Prime Ministers—Sir John A. Macdonald, Sir John Thompson, Sir Mackenzie Bowell, Sir Charles Tupper and Sir Wilfrid Laurier.

Sir John Macdonald was leader of the government for about 19 years, the longest period, but Sir Wilfrid Laurier, leader for 15 years, had the longest unbroken term. Sir Charles Tupper had the shortest term, only two months and one week. Sir Robert Borden was in office for eight years and 10 months. Mr. Mackenzie King, the present head of the government, has been Prime Minister for about 11 years.

All Mr. Melphian's predecessors, except Alexander Mackenzie, were given titles. Sir Charles Tupper received a baronetcy. The widow of Sir John Macdonald was created a baroness. Messrs. Arthur Meighen, W. L. Mackenzie King and R. B. Bennett have remained untitled.

Checking Aliens

Scotland Yard Searching For Aliens Residing In United Kingdom

The special branch of Scotland Yard, co-operating with the Home Office, has launched a thorough check of aliens residing in the United Kingdom, who are estimated to number around 200,000.

Officers are questioning an average of 50 a day and have found many for whom they were searching came to the country last year for the Coronation, renewed their visas last November and have neglected to renew them again.

Immigration officials also are keeping a closer watch for aliens entering at British ports.

Two of the eggs were bad, and the lady had taken them back to the shop. "That's all right, mum," said the grocer's boy, "You didn't need to bring them back. Your word is just as good as the eggs."

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums, aids digestion, relieves stuffy feeling after meals. **Helps keep you healthy!** Take some home for the children too—they will love it!

Refugees From Austria

Seeking Countries That Promise Toleration And Freedom

With refugees pouring out of Germany and particularly from Austria, the League of Nations refugee office in London is redoubling its efforts to gain entry for them into countries whose institutions promise toleration and freedom.

Australia has just signed an agreement accepting 500 annually and the Canadian government soon will be approached to make at least an equal contribution towards a solution of this problem.

Most of the refugees are Jews, although 20 per cent are Christian Jews. The German Jewish aid committee, on behalf of the Orthodox Jews, has raised a large fund guaranteeing the Australian government that none of the settlers will become a public charge for five years. A similar guarantee will be given the Canadian government, it was learned, if the immigration regulations will be relaxed to the extent of permitting entry for 200 annually. The British government is accepting thousands of refugees without guarantee.

Oxford has awarded two of them major chairs and other universities are eagerly seeking the services of outstanding scholars and scientists among the refugees.

SELECTED RECIPES

LIGHTNING LAYER CAKE

3 cups sifted Swans Down Cake Flour
3 teaspoons Calumet Baking Powder
1/4 teaspoon salt
1/2 cup sugar
1/2 cup softened butter or other shortening
2 eggs, well beaten
1 cup milk
1 teaspoon vanilla

Sift flour once, measure, add baking powder, salt, sugar, and sift together three times. Add butter. Combine eggs, milk, and vanilla, and add to flour mixture, stirring until all flour is dampened. Then beat vigorously one minute. Bake in two greased 8-inch layer pans in moderate oven (375 degrees F.) 25 minutes. Spread Soft Mocha Frosting between layers and on top of cake.

Soft Mocha Frosting

4 tablespoons butter
4 1/2 tablespoons sweet coffee
3 cups sifted confectioners' sugar
Dash of salt
1 teaspoon vanilla

Add butter to coffee and heat just to boiling. At once pour over sugar, stirring until sugar is dissolved. Add salt and vanilla. Beat until smooth and of right consistency to spread. Makes enough frosting to cover tops of two 8-inch layers, or top and sides of 8 x 8 x 2-inch cake.

Made To Order

Research Engineer Explains How Synthetic Moonlight Is Produced

Synthetic moonlight which can be produced in the parlor by the flick of a switch appeared as a great boon for love making.

Aubrey E. Noble of Buffalo, research engineer in gas tube lighting, explained it all done with gas tube lighting. Synthetic blue rays of moonlight are produced by switching off all the colors except blue in synthetic daylight.

Synthetic daylight has been used with success by florists in New York. For housewives who like color in their home the engineers have worked out a plan which combines the use of a mercury lamp with fluorescent crystal paint. The walls are painted with fluorescent crystals and rays from the invisible lamp give a brilliant colored effect.

To Avoid Collisions

Civil aircraft operators have been warned against jockeying over London at night, or in fact flying within 20 miles of Westminster bridge between sunset and 2 a.m. at altitudes between 3,000 and 11,000 feet to avoid collisions during manoeuvres.

A new ordinance map of the county of Surrey, England, with a scale of 25 inches to the mile, shows every building more than 10 feet square.

Must Serve Seven Years

Before R.C.M.P. Constables Are Given Permission To Marry

Reports from western Canada that some Royal Canadian Mounted Police constables are resigning because of new marriage regulations could not be confirmed at Ottawa, although officers of the force said it is possible some are leaving for that reason.

After Col. S. T. Wood took command of the force last winter he increased from five to seven years the time a constable must serve before he is given permission to marry. In the early days of the force a man had to serve 12 years before he could marry and this was gradually reduced. Sir James MacBrien, who preceded Col. Wood, reduced it from seven to five years.

The increase back to seven years was made because it was considered the proportion of married men among the constables was too large and affected mobility of the force. It also increased expenses. When a constable is transferred there is the expense of moving his family. Married men also draw double rations and are allowed additional pay to cover separate living quarters.

Constables who have been seven years in the force when the seven-year regulation came into effect will be granted permission to marry when their five years are up, but those who have only one or two years' service will have to wait until they have been in the force seven years.

Advice From Earl Baldwin

Sees Danger In Britain From Mechanized Reading And Thought

Mechanized thinking, mechanized reading and mechanized thought, says Earl Baldwin, constitute a danger in Great Britain to-day.

The former prime minister, opening a community hall at Wilton, England, declared: "Our England has always been a country of individuals, of individual thought, of individual work, of individual minds, and I pray God it may always be so."

Modern transport had increased the influence of the town on the country. The same films were seen, the same newspapers read, in town and country.

"The danger of that," contended Lord Baldwin, "is getting a kind of standardized, suburban, mechanized mind, and it is, in our view as Englishmen, the improper use of these media that in many countries has enforced upon the people a regimentation of thought which we believe is a great danger for the future."

Hoping the community hall would be a means of recreation and enlightenment, he warned: "Be yourselves of the old English countryside. Be your own performers for your own amusement. Be yourselves, think your own thoughts, act as you will, be individual, be independent."

Her Mistake

An Orchard street resident of Brockville, Ont., politely declined the offer when a small boy and girl knocked at her door offering tulips for sale. She said she had tulips of her own in the garden. But she had not. When she went into the garden a few minutes later she found they were gone.

Alphabets of different languages contain the following number of letters: English, 26; French, 23; Italian, 20; Spanish, 27; Russian, 41; Latin, 22; Greek, 24; Arabic, 28; Persian, 32; Turkish, 33.

The monarch butterfly takes migratory journeys, and is said to be capable of a 2,000-mile flight.

No matter how low a man may fall, he can still find a dog and a woman to love him—and usually does.

In Sequoia national park, a chipmunk was declared "champion nut-gatherer" after it had stored 88 nuts in its cheeks at one time.

BRITAIN ORDERS MILITARY PLANES FROM U. S. FIRMS

London.—Great Britain's air mission to North America produced its first development when the air ministry announced Britain had ordered 400 military planes from United States and tentative proposals have been formulated to increase production in Canada.

It was understood the purchases in the United States would cost more than \$7,000,000 (\$35,000,000) and would be deliverable in two years. Two hundred planes were ordered from the Lockheed Aircraft Corporation of Burbank, Calif., for general reconnaissance. An order for a similar number for advanced training duties was placed with North American Aviation, Inc., of Inglewood, Calif.

In regard to Canada the official announcement stated "the mission pursued certain discussions with firms in Canada as to the possibility of bringing into being increased capacity in that country for the manufacture of aircraft on a long-range plan. The government have under consideration certain tentative proposals which have been formulated as a result of those discussions."

Informed sources said both reconnaissance and advanced training planes were required "in comparatively small quantities but by certain dates" to speed up the air program. Those contracted for will be equipped with machine-guns and bombing equipment.

The announcement brought an attack on the air ministry by Oliver Simmonds, Conservative member of parliament and head of an aircraft accessories firm.

He declared the present purchase "should not form a precedent, and that in the future such American types as we desire to purchase should be constructed in Canada."

"It should be realized," Mr. Simmonds said, "that the purchase of such complete a failure on the part of the air ministry to plan its supplies of aircraft from home and domestic sources, this unprecedented move would not have been necessary."

"If in the light of immediate requirements of the royal air force and our own home production, Sir Kingsley Wood (air secretary) feels that this purchase is essential, many are willing, as I am, to concede him point, regrettable though for many reasons it may be."

"Overriding other considerations in the whole matter, however, at the moment our first-line strength is half that of Germany and our monthly production of aircraft is likewise only about one-half of that country's. If the government may be thought, in making this decision, to realize how gravely exercised the country is at this position, then something valuable may have been gained."

Contribution From Miners

South Wales Union gives \$400,000 To Spanish Government Fund
London.—The South Wales Miners' Union executive committee decided to contribute \$400,000 (\$400,000) to the fund being collected by organized labor for the Spanish government. The executive also passed a resolution calling on British miners to boycott all Japanese goods "to express the strongest indignation against the ruthless way of aggression which Japanese imperialism is waging in China."

To Assist Education

Workers' Association In Toronto Receives Grant Of \$5,000
Ottawa.—A grant of \$5,000, the Workers' Educational Association, Toronto, "to assist its Dominion-wide efforts in providing during the fiscal year 1938-39, educational classes for laboring men and women in various centres," is authorized by an order-in-council tabled in the House of Commons. The grant is made under the provisions of the Unemployment and Agricultural Assistance Act.

Burglars Steal Gold

South Porcupine, Ont.—Gold valued at \$41,000 was stolen when burglars broke into the refinery at the Dome gold mines near here, and escaped with \$75 pounds of precipitates. The burglary was discovered when mine officials opened the refinery.

U.S.-British Treaty

Washington.—State department officials expressed hope for completion of a reciprocal trade agreement between the United Kingdom and the United States before the end of July.

Drouth In Europe

Agricultural Situation Alarming States Chicago Business Man After Survey
New York.—A drouth "worse than any in 100 years," combined with unseasonable frosts, insect pests and plant and domestic animal diseases, has created a "very alarming" agricultural situation in Europe, Howard D. Salins of Chicago, managing director of the Flax and Fibre Institute of America, said.

He returned from a two-month trip abroad during which he made an agricultural survey for the institute.

Salins said that the European farming picture had become so "alarming" in the last two months that if the United States had the agricultural products to send abroad "our farmers would be on a high plane of prosperity."

"In Europe, including Great Britain, they have been faced with a drouth worse than any in 100 years," he said. "There isn't a country that hasn't been hit quite hard."

The drouth began in March and was almost continuous until the middle of May, he said, and there were frosts into May, nipping what crops had pushed above ground. He also said farm animals had suffered serious epidemics of hoof and mouth disease.

"Italy agriculturally is in a deplorable condition," he said. "Russia has been hit. Germany has had not only drouth, but such heat that fires have burned crops. The potato crop in Ireland has been ruined. The five-year plans of the dictatorsships have been ruined."

Salins added that "sources like Argentina, Australia and New Zealand have also been hit. New Zealand was a 90-day drouth—the worst in her history," and that this made the world agricultural situation worse.

Criticizes Government

Rt. Hon. Arthur Meighen Refers To Unemployed Occupying Vancouver Post Office
Ottawa.—In Vancouver the government is "bending its neck to a strike" and transferring responsibility from its own shoulders to that of the municipality, Rt. Hon. Arthur Meighen, Conservative leader, said in the senate.

"I suppose if the unemployed took possession of these parliament buildings the government would assume the same attitude and say the matter was up to the municipality," he added. The senate was considering the government measure providing \$20,000,000 in Dominion loans to municipalities for self-liquidating public works. The loans must be guaranteed by the provinces.

Mr. Meighen's reference was to the unemployed taking possession of Vancouver post office. The "spineless government" in Ottawa was just sitting down and letting matters go. To think that such a state of things could be started in the property of the people of Canada "was too awful for Canadians to contemplate," he said.

Interest Not Paid

Britain And France Protest To Berlin Over Austrian Loan
London.—British and French trustees of 1932-34 loans to Austria lodged a strong protest in Berlin against non-payment of monthly interest instalments due June 1.

Britain, France, Italy and other European countries are guarantors of the capital and interest of the loans, but it is understood Italy did not sign the protest. The Bank for International Settlements at Basel, Switzerland, announced it had protested to Germany against failure to pay interest due on June 1 on a 1930 Austrian government loan for which the bank acts as trustee.

These developments came shortly before Anglo trade and financial discussions are scheduled to be resumed in Berlin on problems arising from Germany's annexation of Austria.

Elephant Hunter Killed

Broken Hill, Northern Rhodesia.—Charles Ross, noted elephant hunter who had killed 516 of the great pachyderms, was killed by his 517th victim, according to word received from the interior. Mr. Ross had put 14 bullets in the bull when the wound-maddened beast crushed him to the ground.

Chain Letters

Hamilton, Ont.—Times must be better. The chain letter racket that flourished here three years ago has revived. Instead of 10 cents, the customary amount asked previously, the letters demand 25 cents as the price of good fortune.

Taking Over New Duties

Winnipeg Newspaper Man To Become Editor Of Vancouver Paper
Vancouver.—W. L. MacTavish, editor-in-chief of the Winnipeg Tribune for the past 15 years, will become editor-in-chief of the Vancouver Daily Province, the latter newspaper announced. He will take over his new duties early in July.

Mr. MacTavish has spent his newspaper career in western Canada. In addition to his newspaper work he has been active in various public movements in Winnipeg, has been president of both the Canadian and Empire clubs there, and was regional chairman of the Dominion drama festival, directed the proceedings in Winnipeg last month.

First Crop Report

Shows Conditions Are Fairly Satisfactory In Prairie Provinces
Ottawa.—Crop conditions in the prairie provinces are fairly satisfactory with most of the wheat emerged and coarse grain seeding practically completed, it was stated in the Dominion bureau of statistics telegraphic crop report.

This was the first of a series of seven telegraphic reports covering crop conditions throughout Canada. Included in it is the second of a series of 15 weekly crop reports on conditions in the prairie provinces.

PROTEST AGAINST ATTACKS MADE ON BRITISH SHIPS

London.—The Associated Press said Great Britain was considering putting squarely before Premier Mussolini the matter of repeated Spanish insurgent attacks on British shipping. A foreign office spokesman was non-committal on the report.

Foreign Minister Viscount Halifax broke short a holiday to resume charge of the foreign office as public indignation mounted with each new bombardment of a British boat in Spain.

An insurgent seaplane shelled and machine-gunned the small British-owned Port of Gandia in Spanish government territory, sinking a British dredger and destroying other property with 30 bombs.

Some newspapers concluded Italian and German flyers in Spain were ignoring Franco's orders in continuing to single out ships flying the Union Jack for attack.

The Associated Press said it was learned Great Britain is likely to take the problem up with Mussolini in Rome—there were even unofficial reports, The Associated Press added, that she had already done so.

The Italian premier would presumably be asked, the dispatch added, to use his influence to have the insurgents halt the raids and remind them simultaneously of the possibly detrimental effect of the attacks on Anglo-Italian relations.

Even the word "sanctions"—which is now seldom used—was revived. The Associated Press added, during consideration of possible actions to impress upon General Franco the need for proper respect towards British interests.

However the foreign office spokesman declared sanctions were not being considered in that quarter.

GIVEN MANDATE

Premier W. J. Patterson, whose government was returned to power in Saskatchewan.

King's Birthday Honors

Sir Josiah Stamp, British Economist, Raised To Peerage
London.—Sir Josiah Stamp, the economist who investigated Canadian trading in grain figures in 1931, was raised to the peerage in the King's birthday honors list, which created two viscounts and two barons.

The King also conferred the rare and coveted Order of Merit on the distinguished scientist, Sir Arthur Eddington. The order is limited to 24 and is conferred chiefly on scientists and men of letters. The King celebrated his birthday June 9, although actually the anniversary of his birth falls in December.

The new viscounts: Baron Stonehaven, former chairman of the Conservative party organization.

Baron Weir, former member of the air council, who resigned his position as adviser to the air ministry last month at the time Viscount Swinton's resignation as air secretary.

The new barons: Vivian H. Smith, chairman of the city of London Conservative organization. Sir Josiah Stamp, the economist, who headed the grain futures inquiry in Canada in 1931.

Other honors included: Sir Donald Somervell, attorney-general, becomes a privy councillor. Lewis R. MacGregor, Australian trade commissioner in Canada, becomes a Commander of the Order of the British Empire.

Close Embassy

Report Chinese Foreign Office Is To Close At Tokyo
Hankow, China.—The Chinese foreign office announced that the Chinese embassy at Tokyo would suspend its functions and embassy staff members would return to China.

The spokesman emphasized the move did not mean severance of diplomatic relations with Japan. He said it was prompted by a Japanese use of "underhand methods in disregard of international law to force the withdrawal of Chinese diplomatic and consular representatives."

Family Is Grateful

London.—The home office gave permission to Dr. Sigmund Freud to remain in Britain indefinitely. Dr. Ernest Freud, the 82-year-old Austrian Jewish psychoanalyst, was expressed the family's gratitude to authorities.

New First Aid Post

Saskatchewan Red Cross Sends Equipment To Christopher Lake
Regina.—Equipment has been sent from Red Cross headquarters here to the first aid post at Christopher Lake. This post, located midway between Prince Albert and the national park, is the first one to be established in Saskatchewan.

It is set up in association with the St. John Ambulance Association and the Red Cross. The Red Cross supplies the equipment and the St. John Ambulance Association will supply the personnel. A branch of the St. John in Saskatoon intends to send graduates to look after the post in the summer. The first aid post will be open as soon as supplies arrive.

The Red Cross is sending an ambulance stretcher, a special cabinet of remedies and bandages, blankets, a large metal sign and other supplies, said W. F. Marshall, Red Cross commissioner.

Japanese Casualties

Recent Fighting Has Placed The Total Well Past 300,000
Shanghai.—Casualties in recent fighting in Central China have raised the Japanese total to well past 300,000 and the Chinese to more than 1,000,000, foreign military authorities estimated.

These estimates, based on undisclosed sources of information, said Japanese had lost 32,000 killed between April 1 and May 22, including fighting about Taiyuan, Suchow and Lant in Shantung province.

In the Shanghai and Hangchow area it was estimated the Japanese had lost 300 killed and 700 wounded, mostly in recent guerrilla fighting.

LIBERAL PARTY IS RETURNED IN SASKATCHEWAN

Regina.—The Patterson government has been returned to power with a decisive majority. Liberal strength held in every part of the province except an almost solid bloc of seats north of the Qu'Appelle river and east of Long Lake, where C.C.F., Unity and Social Credit made gains. In only four other ridings in Saskatchewan did the vote go against Liberals and some western seats went Liberal after many years of support for opposition parties.

Gains made by Co-operative Commonwealth candidates means doubling of their representation in the legislature and continuance as official opposition. Premier Patterson won his election in a straight fight with the C.C.F. in Cannington.

Six other members of his cabinet were returned, but Hon. Charles Dunn, highways minister, went down to defeat in a bitter battle with F. J. Herman, Social Credit, in Melville. Hon. J. M. Parker, veteran of the house and Speaker in the last legislature, went down to defeat in a four-sided fight in Touchwood, where Tom Johnson, C.C.F., won out.

Hon. R. J. M. Parker, minister of municipal affairs, defeated Mrs. Germaine Telford, C.C.F., nominee in Pelly, and retained the only Liberal seat in northeastern Saskatchewan.

Not represented in the legislature during the past four years, Conservatives again failed to elect a man though their young leader, J. G. Dieffenbacher, K.C., made a spirited fight in Arm River and lost by only a small margin to G. H. Danielson, Liberal member of the last house. Almost oblittering the Social Credit threat, Saskatchewan gave the Co-operative Commonwealth party 10 seats in the new assembly with George H. Williams, party leader, again the choice of the mid-northern seat of Wadena.

Mr. Williams' team mates in the old assembly oddly enough went down to defeat, with the exception of L. H. Hantelman in Elrose. H. H. Kemper lost in Gull Lake, Clarence Stork in Swift Current and A. J. Macauliffe in Cutknife.

Liberals more than held their strength in the drouth country. South of the South Saskatchewan and Qu'Appelle rivers only one opposition candidate was elected, Herman Warren, one-time Conservative member, defeating J. B. Smith, former Liberal member, in Bengough.

At the same time southwestern areas, formerly represented by two C.C.F. members, returned to the Liberal column.

In the complex array of 10 two-man fights, 21 three-sided fights, 13 four-sided fights and odd assortments of five-way battles 11 candidates lost their deposits, most of them Social Crediters.

CHINA APPEALS TO POWERS FOR ARMS EMBARGO

Shanghai.—General Chiang Kai-shek, leader of war-torn China, called upon friendly powers "to fulfill their treaty obligations by giving China positive assistance."

Chiang made the plea in a formal statement issued at Hankow, provincial Chinese capital, as his people fled before the invading Japanese, evacuating their homes in three cities in one of the greatest mass exoduses in recent history.

While Chiang declared China still was confident of "ultimate victory," he asked all friendly nations to aid China by economic sanctions, arms embargoes and trade boycotts against Japan, specifically recalling resolutions adopted by the League of Nations in support of China.

Roads were black with slowly plodding refugees fleeing Chengchow, strategic Honan province railway junction, while civilians also fled from Hankow, south of the Yangtze river, and Canton, big port of south China.

Prepared to blast out what Chinese officers remain in Chengchow, the Japanese hauled field artillery as they maintained a steady plane bombing of the area.

Twenty-one foreigners, including a number of missionaries, remained in Chengchow, from which the main Chinese defences have been withdrawn.

Washington.—A stern demand by the United States government that Japan stop bombing non-combatant property in China drew an approving statement from Senator Norris (Ind., Democrat).

Norris suggested the possibility of cutting off American arms shipments to the Orient in an effort to curb aerial attacks and "slaughter of innocent persons."

The request for an end to attacks on non-military objectives was handed to Japanese officials at Tokyo by Joseph Grew, United States ambassador. The state department had instructed him to state that Japanese government's attention to a recent attack on the campus of the American-endowed University of Lingnan.

Bombs Worry France

Era Of Forbearance Is Past, Says French Premier
Paris.—The era of "forbearance" is past. Border defences will fire upon any plane attempting to cross the Franco-Spanish frontier, Premier Edouard Daladier told the chamber of deputies. He stated the identity of nine planes which bombed Ax-les-Thermes, France, had not yet been determined.

Anti-aircraft defence batteries and other military weapons heretofore were only firing warning shots or signals, he said. "Hereafter they are to open fire as soon as a plane crosses the French frontier," regardless of its nationality.

Daladier said an entire pursuit squadron was based near the frontier and is in constant patrol. Fragments of the 26 bombs dropped by the "mystery" squadron of nine planes between the village and village of Orges are being carefully examined by government experts, Daladier said, intimating their findings may have "grave consequences."

Unemployed In Britain

Larger Number Attributed Partly To Registration Of Juveniles
London.—Latest unemployment figures showed a rise of 31,041 in a month and 382,000 compared with a year ago.

Unemployed at May 16 totalled 1,778,905 with the increase marked in coal and cotton industries. The labor ministry attributed it partly to registration of juveniles who reached the school-leaving age at Easter. Employed persons totalled 11,375,000, 15,000 below the previous month.

Magazines Banned

Ottawa.—The department of national revenue weaponised heretofore magazines, published in the United States have been banned from Canada under the indecent publications laws in the customs tariff. The magazines are Personal Romances, Private Detective, Ten Story Gang, and Love and Romance.

Educational Program For Egypt

Cairo.—Egypt, with 88 per cent. of its population illiterate, plans a five-year educational program involving establishment of 400 schools a year and expenditure during the five years of about \$3,750,000.

CANADIANS ATTEND EMPIRE DAY LUNCHEON

Many prominent Canadians in London attended the Empire Day Luncheon given in honor of the Right Hon. Sir Thomas Inskip, Minister of the Co-ordination of Defence. In the picture are two well known Canadians (left to right), Mr. W. A. McAdam, acting Agent General for British Columbia, and Mr. Arthur B. Purvis, Montreal.

CROSSFIELD, ALTA, THURSDAY, JUNE 16, 1938.

Disrupting Dominion.

One of the most disquieting conditions of the moment is the effort of create disruption between east and west, and between federal government and provinces. In this zeal to secure greater privileges for their own section of country or further personal ambition, provincial leaders in different parts of the Dominion, are attempting to belittle and deny the authority of the present government, and to undermine the true spirit of Confederation. It is not a pleasant picture of home life, and all the more shameful at a time in the world's affairs when Canada should present an example of unity and peace.

In no part of Canada is it so discreditable to sow such seeds of discussion as on the western prairies. Here we have a population drawn from all parts of the world, some of inflammable temperament, responsive to any suggestion of oppression. Quite a proportion of these people know nothing of Canada beyond the little spot in the West in which they have located. There has never been any presentation made to them of the history of Canada, its early settlement, and the grandeur of its spirit and accomplishment. Instead, in recent date, they have been fed consistently with propaganda, picturing Ottawa as a cruel overlord, a ruthless autocrat, an oppressor of the masses. Those who seek so to distort the foundation of our national union, are betrayers of their country.

Native Canadians are inclined to dismiss this menace as less significant than it actually is. For them Canada is an indivisible whole, every province of significance in its contribution to that whole. Their remote forefathers crossed the ocean to found a new family in the virgin lands of the Maritimes. Members of a succeeding generation moved onward to Ontario, creating farm lands out of wilderness. Still another generation adventured westward to settle on the prairies or the Pacific. And so Canada has grown, largely out of the labours of succeeding generations of pioneers, whose lives shine through the peaceful, aspiring history of the Maritimes, of Quebec and Ontario, of the Western prairies or the British Columbian valleys. To such Canadians every part of Canada is dear, every part enveloped in some family association or experience.

But it is not to these that propagandists are making their loud appeals. They bring their disintegrating influence to bear upon those who have had little opportunity to know Canada as a whole, and who have not yet formed a strong attachment to the land of their adoption. It is true that recent years have brought disillusionment and trouble to many fine people, but certain public leaders are seizing upon this condition to undermine the solidarity of the Dominion. To what end?

Granted that the constitution of Canada is not ideally fitted to present needs. Granted the provinces may with good reason be seeking certain adjustments and amendments. There are surely better and more constructive methods of achieving this end, than by fostering delusions of oppression, attacking the authority and purpose of the senior government. Such methods have earned the active resentment of all true Canadians—Vulcan Advocate, June 2.

Screen Star Travels Canadian Way

Louise Fazenda, of movie fame, and her husband, Hal Wallis, official of Warner Brothers, are seen here on the Canadian Pacific liner "Empress of Canada" just before sailing to Honolulu for a holiday. They were accompanied by their five-year-old son, Hal Junior, who has never yet faced a camera, either professional or amateur.

When You Think of Paying Your Accounts Think of THE CHRONICLE

Letters to the Editor

As an act of courtesy, "Letters to the Editor" are published, but the Chronicle cannot be held responsible for the opinions expressed.

Crossfield Alta June 11, 1938

Editor Crossfield Chronicle;

Dear Sir:

In the June 9th issue of your paper it will be noticed at the foot of your account of the Board of Trade meeting you comment that the "Board" is working for the benefit of the people, but you neglect to mention WHAT people.

However a few of the preceding paragraphs enlightened the reader who witnessed the resolution to the Dominion Government to disallow legislation of the Provincial Government. The fact that children in this fair province are going ill clad and underfed evidently mean nothing to the men who have placed their names to this disgraceful document. The fact that in this so called Democratic country the majority of voters vote for just such legislation, evidently means nothing to those who, when they find the umpire has ruled them out, dare to run home to "Mama" and complain the winning team isn't playing fair. Yet they dare to call themselves sportsmen, some even dare to claim the name of Christ while saying, in effect, to God's creatures,

"starve darn you" we must protect our masters of finance.

The branch banks are not to blame. For the most part they are managed and operated by the best of citizens, albeit much misinformed and un-informed. The trouble lies at the source of banking aided and abetted by corrupt politicians who, rather than relinquish their strangle hold on their ill-gathered seats in parliament, will sell their souls for a mess of pottage to the highest bidder. The pity is that people who should know better will swallow line and sinker what they are told because some one else who ought to know better, but don't, has told them it is so.

There were two slogans we learned in business college which would be useful for many of us Crossfieldites at the present time. One is "There is an excuse for not knowing but there is no excuse for not finding out." And the other is "Be sure you are right, then go ahead."

It has been said "The devil is invisible in coming and invisible in going, but the handwork he leaves is visible to all. With the added odor of brimstone lingering about it."

If it hadn't been for that resolution to endeavor to avoid the will of a democratic people I would have gone on supping that peculiar smell was either from Turner Valley or the forest fires.

"MEN AT WORK?"

The most cheerful sign on the road

★ ★

"MEN AT WORK" is an encouraging, cheerful sign upon the highway.

It is the happiest sign on the business highway too. Business enterprise, making wise use of banking service, is the mainspring of employment.

The contractor responsible for that "Men at Work" sign gets the job of building that stretch of highway by being the lowest responsible tenderer.

Not always does he have the ready money to buy all the materials, pay wages and build it out of his own resources. He goes to the bank and, having assets and a good reputation, he negotiates such advances as he may need.

He orders materials, sets men to work. As the job proceeds, engineers' certificates enable him to collect from those with whom he contracted, and the work goes on.

The highway finished, the bank is repaid. Such repayments enable the bank to supply credit to other responsible borrowers.

A manufacturer gets a large order, with an early time limit for delivery. With only a hundred men, his factory cannot turn out the articles within the time required. With more men he can do it—but he lacks sufficient cash.

Operating his factory, as a going concern, with a profitable order and having a reputation for integrity, he asks the bank to lend him what he needs to pay wages.

The bank makes him a loan. He takes on more men. They get wages. The goods are turned out, delivered and paid for. The manufacturer repays the bank with the agreed interest.

He has his profit and can spend some money developing new business to keep his men employed.

How does a bank make these advances—where does the money come from?

Banks, having branches throughout Canada, mobilize the surplus funds of millions of depositors, large and small, and, based upon them, make credit available throughout the country as may be required.

Millions of little sums represent the toil, production and lifetime savings of Canadians—your fellow-citizens.

Safeguarding these deposits is the bank's first care.

Deposits of \$1,000 or less—most of them much less—are owned by 3,770,000 out of Canada's 4,084,000 savings depositors. The total of all bank savings deposits in Canada is nearly \$1,584,000,000; the average savings deposit in a bank is only \$387.

Wisely safeguarded by Canada's chartered banks these deposits furnish credit that keeps "men at work" when used by Canadian business and industry—producing new realizable

wealth from Canada's great resources. The country and all its people benefit.

In the field of business deposits, out of an average of 660,000 "current" accounts, 596,000 amount to \$1,000 or less.

Savings deposits are, primarily, the basis on which banks can make loans.

Only the confidence of the people and their willingness to leave their money on deposit, enable a bank to lend money and—at small profit-margin to itself—serve the community.

We have mentioned the contractor and the manufacturer. The same process stimulates employment throughout the whole fabric of production, industry and commerce.

Loans to agriculture and for marketing agricultural products totalled in 1937, \$39,234,000—9.0 per cent. of all ordinary bank loans shown on the return to the Minister of Finance, October 31st, 1937.

Of this sum \$57,490,000 went to farmers, cattlemen and fruit raisers and \$30,804,000 to grain dealers, seed merchants and grain exporters.

Other bank loans went to municipalities and school districts; wholesalers, retailers, manufacturers of and dealers in lumber, pulp and other forest products; fishermen; fish packers and curers; public utilities including transportation companies; stockbrokers and bond dealers; provincial governments; mining men; churches, parishes; hospitals; and to charitable and religious institutions.

Canada's chartered banks defend and protect the safety of the funds of depositors—the millions of thrifty souls we have entrusted to their banks.

No Canadian depositor, even through the world-shaking events of recent years, has had to fear for the safety of a single dollar lodged with Canada's chartered banks.

The funds of depositors are their own—not a reservoir from which everybody may draw at will for any and every new financial experiment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

ANSWER THE BASEBALL QUESTIONS EACH WEEK

Answers to be made in writing and sent or handed to M. N. Jones, Secretary of the Juvenile ball club. Anyone under 21 is eligible. Neatness to count. More questions will be published at later date. To be eligible for prizes, complete set of questions must be answered.

QUESTIONS

1. What constitutes a balk and what happens if a balk is made.
2. What is a bucket stepper.
3. What are the dimensions of the batters box, and how is it situated in relation to home plate.
4. How many players can be on the base line at one time, when a runner is trapped between bases.
5. What is a sacrifice hit.

A baseball tournament is being arranged for July 1st, with teams from Acme, Carbon, Olds and Crossfield.

There will also be softball games with teams from the surrounding country.

The local Senior ballteam visited Carstairs Tuesday evening. When an even game was played. The batteries were: Carstairs-Campbell and Stault, Crossfield-Sharp, Moen and Laut. The score was 9-7, in favour of Carstairs.

The Carstairs team will play a game in Crossfield Tuesday, June 21st.

FUMBLE BALL.

A large evening was spent at the park Monday, when the local married men played against the East Community married men. Scorekeeper M. N. Jones ran out of paper two or three times and then found it hard to count the runs of the East Experts.

We heard the score was somewhere around 45-10. Whether this is correct, we cannot tell, the locals not having played softball for many years, got a few runs anyway.

This is the first game the married men of Crossfield have played, since organizing this spring, but we hope that in the near future they will be as good as the girls.

If you did not see this game you sure missed something.

CROSSFIELD SENIORS LOSE TO MELVIN

The Melvin Baseball nine defeated the local Seniors Sunday, June 12, by a score of 5-2 in a regular Bush League fixture, at the local diamond, before a good crowd.

The game was a pitchers battle all the way.

J. Tuggle, in the Melvin box, was credited with nine strikeouts and allowed only two runs. McDonald and Moen local hurlers were credited with twelve strikeouts and allowed two earned runs.

Three runs being scored on errors. The Melvin players showed why they are leading in the Bush League. Besides having plenty of punch at the plate, perfect harmony is quite evident among the players and all seem to play for the good of the team, and not individual honors.

Crossfield played a fair brand of ball, but, with the exception of one or two players, are terribly weak at the bat.

And the Mighty Casey Struck Out.

Batteries: Melvin - J. Tuggle and B. Wider, Crossfield-McDonald, Moen and Hills, Laut.

Umpire T. G. Moore.

LOCAL PEEWEES LOSE TO EAST COMMUNITY

The local PeeWees journeyed to the East Community diamond last Friday evening, to play a return game, but returned home on the short end of a 5-2 score, before a fair turnout of fans.

Batteries: East Community-H. Wickerson and W. Hall, Crossfield E. Butler, S. Berg and B. Hopper.

The World of Wheat
By H. G. L. Strange

The complete report of the Turgeon Royal Grain Inquiry Commission is now available, and is well worth the study of all who are interested in the welfare of our Prairie farmers.

Justice Turgeon stresses strongly the importance of maintaining the quality of Canadian wheat. He draws attention to authoritative opinions that though the World demand for export wheat may somewhat decline, yet the demand for high quality wheat may actually increase.

The Commissioner then speaks in very high terms of the work of the "Crop Testing Plan" as a means of improving the quality of Canadian wheat, stating, "This (the 'Crop Testing Plan') to my mind is a scheme that deserves every possible encouragement and support. It is especially important in view of the efforts being made in other competing countries such as the Argentine, Australia and Russia, to increase the quality and uniformity of their wheat."

The "Crop Testing Plan" this year will test about thirty thousand farmers' fields of wheat. A visit by farmers and others to any of the 750 Demonstration Plots or to any of the 100 larger Testing Plots, will show the present state of the quality of our wheat, and exactly how improvement is being effected.

"Undoubtedly the Western producer works under a disadvantage in Canada's fiscal policy—. The custom laws of other countries, including Canada, played some part in the adoption of policies that led to a shrinkage of wheat imports into the following countries: Switzerland, Italy, Belgium, Holland, and in a less degree Germany and France."

These are the significant and important words used by Justice Turgeon in the Royal Grain Inquiry Commission Report just issued.

The Hon. Mr. W. D. Euler, Minister of the Department of Trade and Commerce, has recently reminded us that "Practically every person in Canada is affected by the trend of Canada's trade—. Our problem is to find markets for our surplus production. On our success in doing so depends the livelihood of one half or more of our population".

Not only do high tariffs lose markets for our wheat, as Justice Turgeon reports, but in addition they increase the cost of all the things that prairie farmers have to buy for living and production.

The lowering of high tariffs and the removal of other restrictions against international trade would, therefore, considerably benefit our prairie farmers. Such action in addition would bring about increased world prosperity and would remove a serious cause of war.

THE ALBERTA PACIFIC GRAIN CO., LTD.

If you have sown a seed grain plot on your farm the approved advice of the Crop Testing Plan as to its care is available at Alberta Pacific Elevators.

WORLD HAPPENINGS
BRIEFLY TOLD

A resolution asking that a percentage of vacancies in English schools for anti-aircraft training be reserved for war veterans was passed at the British Legion conference.

Britain, United States and several European countries are expected to send representatives to the international canoe championships to be held in Vaxholm, Sweden, Aug. 6 and 7.

Robert Perkins, airman M.P. for Stroud, England, released a pigeon, flew 100 miles to his home.

Sir James MacBrien, former commissioner of the Royal Canadian Mounted Police, who died March 5, left an estate of \$35,331, according to his will filed for probate.

United States congress has been asked to add \$700,000 to the \$2,554,517 already available for control of grasshoppers and other pests as the original amount was not enough.

T. Eaton Company (Western) Ltd. will construct an \$800,000 departmental store this year in Edmonton. It was announced at Calgary. The tentative plans call for a two-story and basement building.

Sir Edward Deny Bacon, 71, one of the world's foremost stamp authorities and supervisor of the magnificent collection of King George V., died recently at his home in South Crofton.

Establishment of a diploma course in naval navigation was announced by the University of Toronto. Honor matriculation will be necessary for admission to the two-year course, which begins Oct. 1.

Pensions for former members of parliament and their widows will be provided under a bill the British government is expected to introduce shortly. A pension of £3 (£15) weekly for ex-members and 20 shillings (\$4) for widows is proposed.

Outlook Is Promising

Best Prospect Seen For Agriculture

J. S. McLean, president of Canada Packers Ltd., in an article appearing in a recent issue of the Toronto Stock Exchange Monthly Bulletin, states that, owing to the large British quota for bacon according to the Ottawa agreement, hogs are selling at high prices and are netting the producer a large profit. The outlook is that the high price level will be maintained.

In wheat the prospect of a high price is somewhat less assured. World production will probably be greater than last year. It seems certain United States will have a substantial surplus.

"But the world carryover of hard wheat of the Canadian type was extremely light and a good demand is likely for the Canadian crop, even although that crop is much larger than in recent years."

"As for cattle, the outlook for 1938 is distinctly better than for 1937. On cattle put into the feed lots last fall the farmers have lost money. But recently prices have been firmer. One of the hopes is that in the trade agreement now being negotiated with the United States better terms may be secured for Canadian cattle entering that market."

"On the whole, the outlook for agriculture in Canada in 1938 is more promising than for any year since 1930."

Sigmund Freud

Noted Author Plans To Make His Home In England

Dr. Sigmund Freud, 82-year-old father of psychoanalysis, who for years has been trying to find out why men kill each other, came to London to make his home. He went into a self-imposed exile from Nazi Austria to finish a book on the Bible.

Despite his great age, the noted author appeared vigorous and willing to continue his work in a land removed from Austria, where he had lived for 70 years. His tall, slender figure still was upright. His dark, friendly eyes appeared to have lost nothing of their former brightness.

Freud arrived at Victoria station with his wife and was greeted by Dr. Ernest Jones, president of the International Psychoanalytical Association. He was driven away in an automobile from one end of the station while his son, Dr. Martin Freud, and a group of newspapermen, photographers and news reel cameramen waited him at the other end. Dr. Freud was driven directly to St. John's Wood, where a modern house had been rented for him for a few months while he seeks government permission to remain in England for the remainder of his life.

Kind words are never lost—but they are frequently mislaid.

Restored To Favor

Story About Regular Hand-Out Customer And A Window Blind

It seems that elegantly dressed housewife has regular customers for handouts of food. And our tale contains a thought for all who ponder on problems of public relations.

A story going around at the moment concerns the Spring house cleaning, a regular customer and an ordinary window blind. The window blind was one of a dozen or more on a chair in the kitchen porch where a regular customer was given breakfast.

The housewife was momentarily absent when the customer departed. An hour later, when the windows were ready, the blinds were sought. One was missing.

The regular on his next visit was told that no more food would be given out because the blind was missing. The regular denied the theft; the lady was adamant. He went breakfastless away. But his back the next day with the report that he had seen the missing blind in a second-hand store on Queen street and if the lady would give him 15 cents he could buy it for her. She gave him the fifteen cents.

Half an hour later he returned with the blind and thereby regained his former right to one breakfast per week or thereabouts.—Printed Word, Toronto.

A COOL, BREEZY, YOUNG FROCK

By Anne Adams

Styles may come and styles may go, but the "swing skirt" frock seems to go on forever. As far as the young set is concerned, it's the very type of dress to make a girl in her teens and twenties feel especially graceful and alluring. Here, in Pattern 4722, Anne Adams has given an exciting lift to the waiting, a person's dress to the brief, ruffled sleeves, a soft and flattering treatment to bodice and neckline that makes this the perfect little frock for summer! The best fabric for it? A dainty all-over printed voile, a chiffon, or a printed silk crepe.

Pattern 4722 is available in misses' sizes 12, 14, 16, 18 and 20. Size 16 takes 3½ yards 39 inch fabric. Illustrated step-by-step sewing instructions included. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

Sounding Rocket

New Style Of Parachute To Bring Rocket Safely Back To Earth

A new art in parachuting has been developed in the desert in New Mexico to bring safely back to earth the great sounding rocket of Prof. H. Goddard of Clark University.

The early rocket ships usually descended themselves by falling to the earth after they had ascended a mile or more. This new ship comes down gently with a parachute.

The Goddard rocket is 18 feet long, about a foot in diameter, made of aluminum painted black, and capped with a shining conical head. It weighs only 84 pounds after its flaming oxygen-gasoline tail which drives it up is exhausted. At this point the cap opens and two parachutes come out. A small one carries meteorological instruments sent up with the rocket. A large parachute with a spread of 10 feet is for the rocket's descent.

The speeds which this pioneer rocket ship has developed run up to 700 miles an hour.

THOUSANDS DROPPED

Thousand Islands Bridge International Ceremonies To Be Held On Opening On August 18th

Governor Lehman of New York has accepted an invitation to attend the opening on Aug. 18 of the new Thousand Islands International bridge. A delegation composed of Vice-Chairman Frank J. Martin of the Thousand Islands Bridge Authority, State Senator Perley A. Fitcher and Assemblyman Russell Wright presented him with the formal invitation, and the Governor said "yes" then and there.

President Roosevelt has conditionally accepted a similar invitation, and Prime Minister Mackenzie King of Canada has made full acceptance. Other leading officials of the Federal and Canadian governments, New York State and the Province of Ontario will attend the international ceremonies dedicating the new \$3,000,000 bridge system and celebrating the century of peace and good will between the U.S. and Canada.

Consisting of five separate spans and over eight miles of approaches and connecting roadways, the Thousand Islands International bridge will cross the St. Lawrence river and scenic Thousand Islands from Collins Landing, N.Y., between Clayton and Alexandria Bay, to Ivy Lea, Ont., near Gananoque.

Educational Research

Organization Of Canadian Council Will Be Recommended

Organization of a Canadian Council for Educational Research will be recommended to the biennial conference of the Canadian Educational Association in Halifax, August 15, by a five-man committee appointed to study the problem of national research in education in Canada. It was announced the committee, headed by Dr. H. F. Munro, president of the C.E.A., met in Toronto to draft its recommendations. It was appointed at the biennial conference of the C.E.A. in Regina.

On the proposed research council, it was announced, will be one representative from British Columbia; three from the prairie provinces; four from the Quebec-Ontario area; four from the Maritimes and three co-opted members.

Not A Deception

Bachelor Found Income Tax Deduction Not Allowed For Housekeeper

Add income tax additons: A bachelor in Providence, R.I., who employed a housekeeper, thought he could deduct the \$4 a week he paid her plus the price of a new bed and bed spring he bought her "because she threatened to quit if I didn't."

The U.S. Government ruled the housekeeper was earning her livelihood and couldn't be classed as a dependent under the law.

Discovery of two new seams of rich coal at Bemish, Eng., will provide 20 years' work for 1,000 men and boys.

"Rubber" Made from Limestone, Coal and Salt

One of the most important materials applied to us by nature is rubber, sometimes called "Black Gold" because of its commercial value. First brought to the attention of the civilized world by Columbus who found the natives of Haiti playing with a rubber ball, this material is now used for literally thousands of purposes and is the basis of an industry which does a billion-dollar business annually.

While hundreds of different trees, weeds and vines contain rubber, none equals in quantity and quality that obtained from the milky juice of the Hevea tree, native to the equatorial jungles of Brazil. In spite of the fact that the Hevea tree is now cultivated in various tropical countries other than Brazil the market price of rubber sometimes reaches such a level as to disturb the rubber industry and the public as well. In addition, several important industrial products do not own any land suitable for the production of rubber.

As a result of this situation, chemists throughout the world during the past fifty years have spent many millions of dollars trying to make synthetic rubber. Although chemists have not yet succeeded in the commercial manufacture of product identical with that obtained from the Hevea tree, they have done better. Using four of nature's own raw materials, limestone, coal, salt and water, chemists are now making a product known as neoprene which looks like rubber, acts like rubber, and is in many respects better than practically all articles for which rubber is now used.

The chemical story, briefly told, is as follows: Coal and limestone heated together in an electric furnace give calcium carbide, which, on the addition of water, gives acetylene gas. This part of the story is familiar to some of the older boys who used

"barbide" headlights on their bicycles some years ago. Acetylene plus a material known to the chemist as a catalyst gives another gas known as monochloroacetylene. The latter, plus hydrochloric acid (made from salt), gives a liquid

called chloroprene, and the union of intermolecular of chloroprene molecules gives the new rubber-like neoprene.

Although tough and elastic like rubber, neoprene is chemically different, and because of this difference does not fear rubbers' age-old enemies—gasoline, oils, chemicals, oxygen, sunlight and heat. This man-made product is accordingly not a rubber substitute, but is used for a variety of purposes for which rubber is not well suited, including the manufacture of gasoline and fuel oil hose, printing rollers, electrical cables, and acid-resistant gloves. And although neoprene costs more per pound than rubber, certain articles made from neoprene are actually cheaper than corresponding rubber articles, because of their longer life under severe service conditions. Neoprene also offers the advantage of an excellent substitute in the event of the supply of natural rubber being curtailed or cut off entirely.

Good Man For Job

New Commander-In-Chief At Gibraltar Must Be Obedient

General Sir W. Edmund Ironside, who is to succeed General Sir Charles Harrington as Governor and Commander-in-Chief at Gibraltar, is a big man in inches, a stern disciplinarian, a linguist, and has eyes which can make any man quail.

The artillery defenses of Gibraltar, seated on the St. Lawrence river and the changed Spanish conditions Great Britain needs a first-class artilleryman at "Gib."

General Ironside learnt foreign language, like the expert he is. He put down on a postcard a list of words every day and memorized them. They built up a vocabulary by short and intense concentration.—News of the World.

Indian Origin More Likely

Anticosti Comes From Word Meaning "Where Bears Are Hunted"

Anticosti, the island so much discussed at present, was called Anticosti by Jacques Cartier when he first sighted it in 1534, and Anticosti by a later explorer, but within the next hundred years had become generally known as Anticosti. From it is said, an Indian word, which means "where bears are hunted." Derivation from Spanish words "before the coast" has been suggested, but the Indian origin is more likely.—Toronto Star.

SUNDAY SCHOOL LESSON

JUNE 19

THE SUFFERING SERVANT

Golden text: For the Son of man also came not to be ministered unto, but to minister, and to give his life a ransom for many. Mark 10:45.

Lesson: Mark 10:23-39.

Devotional reading: Isaiah 53:4-9.

Explanations And Comments

The Crucifixion, Mark 15:22-27. The knoll into Jerusalem to which Jesus was led, the whole minute called Golgotha in Greek, Calvary in Latin, words which mean "a skull." For it was skull-shaped. As was customary before a crucifixion, Jesus was offered a stupefying drink, wine and myrrh, but he refused it. Then at the third hour of the day they crucified him.

His garments were the perquisites of the executioners. His headgear, shoes, outer garment and girdle would not be an article for each of the four men. They cast lots to decide which each should have, and also for the seamless inner garment. Above his cross was written, in Hebrew, Latin and Greek (Jn. 19:20), "The King of the Jews." Pilate could ascribe no crime to Jesus, and did write this inscription written so as to annoy the people who, as he expected, considered it an insult to themselves (Jn. 19:21, 22). On each side of the cross was written, in Latin, "Darnes, Desolation and Death, Mark 15:36-38. From noon till three in the afternoon there was darkness over the land.

At the ninth hour Jesus uttered with a loud voice in Aramaic the first sentence of the Twenty-second Psalm, "My God, my God, why hast thou forsaken me?" "Behold, he calleth Elijah," was what many bystanders said. There were many stories of Elijah's appearing to rescue men in peril. "No Jew could have mistaken Eli (or Eloi) for the name of Elijah," exclaims Dr. Ederheim, "nor yet misinterpreted a quotation of Psalm 22:1 as a call for the prophet."

Some one ran and held up to Jesus' mouth a sponge fastened to the end of a reed filled with sour wine, the customary drink of the Roman soldiers. This was in answer to Jesus' cry, "I thirst," Jn. 19:28. "Let be—Allow me to give him drink," was the meaning of the cry: "let us see whether Elijah cometh to take him down." He seems to think that because he was prolonged, the Elijah would be given sufficient time to come, if he would.

Crying with loud voice, "Father, into thy hands I commend my spirit," Lk. 23:46. Jesus died.

The veil of the temple was rent in two from the top to the bottom. Matthew reports an earthquake. The Jews were hung between the Holy of Holies and the Holy Place, and could be put aside only by the High Priest tearing the veil a year when he entered the Holy of Holies. "It is a picture of atonement, of access to God through the sacrifice of Jesus by a new and living way." "The demon of the divine Sufferer greatly impressed the centurion. It was the death of no human prophet or martyr. The darkened skies, the earthquake, the shock of the trumpet, that loudly dismissal of his spirit, all speak of a voluntary death, all combine to make thoughtful men unite in the exclamation, 'Truly this man was the Son of God.' (C. T. Edman.)

Given his first taste of ice cream in the diner, Simon asked "Why is it cold? You can have things hot here, can't you?" When hot tea followed the ice cream, the Eskimos laughed merrily at the weird logic of the white man.

On his arrival in Montreal, they attended mass in the Bishop's private chapel and were not at all surprised to hear chants in the Eskimo language on phonograph records.

The memorable journey began on April 25. The train was boarded at Churchill. The Eskimos will return to the Arctic by boat in July.

Seemed Sensible Idea

Candidate Has His Own Way Of Using Campaign Funds

A political office in a small American town was vacant. The office paid \$500 a year, and there was keen competition for it. One of the candidates, Ezekiel Hicks, was a shrewd fellow and a neat campaign fund was turned over to him. To the astonishment of all, however, he was defeated.

"I can't account for it," said one of the leaders of Hicks' party gloomily. "With that money we should have won. How did you lay it out, Ezekiel?"

"Well," said Ezekiel, "yer see that office pays only \$500 a year salary, an' I didn't see any sense in paying \$1,200 out to get the office. So I bought a little farm instead."

Fulfilled Early Promise

Sir Joseph Thomson One Child

Prodigy Who Made Good

Youthful prodigies do not always bear out their early promise, but that certainly cannot be said of Sir J. J. Thomson, Master of Trinity College, Cambridge, whom the coveted Kelvin Medal has been awarded for his eminent services to engineering science.

Sir Joseph entered Owens College, Manchester, at the age of 14, to take the natural sciences. The event caused such a stir that the age limit was immediately raised!

But the boy quickly proved his worth, and since then 20 universities have presented him with degrees, 11 learned societies with fellowships, nine others with medals.

He was one of the original holders of the Order of Merit, and he won the Nobel Prize for Physics 32 years ago—a record of distinction that is probably unique.—News of the World.

Has Plenty Of Cheese

Germany Urges People To Eat More And Keep Well

"Eat cheese and keep well," the German Government suggested with small effects. Floats loaded with cheeses from the most pungent imitations of the real thing would the odoriferous way through Berlin's residential streets with the "eat cheese" banners. Cheese is one of the few things of which there is a glut on the German market.

Julius Caesar was very punctilious in regard to the management of his household, and once put his baker in irons for serving him with one kind of bread and his guests with another.

These are times when a man needs a new hat but does without it. However, it's different with his wife.

James Bay is about 230 miles from north to south and about 140 miles from east to west. 2299

Eskimos Make Long Trip

Accompany Priest From Chesterfield Inlet To Quebec Congress

After travelling more than 1,500 miles by dog train and railway, three Eskimos, the only natives at Chesterfield Inlet reached Montreal on the Continental Limited of the Canadian National Railways, on their way to Quebec, delegates to the Eucharistic Congress. They were accompanied by Rev. Father L. Ducharme, O.M.I.; the eldest of the group is Alphons Kollitser, 35, who bears his name "The Fat One". John Ayuray (Strong Pusher) is 27. He supplies the Eskimos with caribou, seals, white whales and fish when he is at home in the Arctic, and on the 450-mile journey on the ice along the shore of Hudson Bay he hunted seals to feed the 19 dogs that accompanied him.

It was the first party on the first stage of its first trip to civilization. The third party is Simon, John's little seven-year-old son.

Speaking neither English nor French, the Eskimos gave their impressions of their rail journey and this part of the world through Father Ducharme, who speaks their tongue fluently. What surprised them most, they said, was the size of the crowds in the train, never having seen an engine bigger than an outboard motor, they were overawed by the great locomotive and appreciated the opportunity given them by the caribou to visit the engineer's cab. They described their berths as "moving igloos."

Given his first taste of ice cream in the diner, Simon asked "Why is it cold? You can have things hot here, can't you?" When hot tea followed the ice cream, the Eskimos laughed merrily at the weird logic of the white man.

On his arrival in Montreal, they attended mass in the Bishop's private chapel and were not at all surprised to hear chants in the Eskimo language on phonograph records.

The memorable journey began on April 25. The train was boarded at Churchill. The Eskimos will return to the Arctic by boat in July.

"Well," said Ezekiel, "yer see that office pays only \$500 a year salary, an' I didn't see any sense in paying \$1,200 out to get the office. So I bought a little farm instead."

Jamaica Starts Big Task

Will Spend \$2,500,000 On "Back To The Land" Scheme

Acting Governor C. C. Woolley, of Jamaica, has announced the island's government will embark immediately upon a \$2,500,000 ("back to the land") scheme as a step toward solving the colony's unemployment problem.

A special department with an experienced staff would be set up to devote its attention to the task. Land would be bought by the government and sold to the people on easy terms. Agricultural implements, seeds, roots and stock would be provided and the services of expert agriculturists would be available, he said.

Although great ice sheets now exist only in the polar regions, the earth is still an ice age, since some six million square miles are blanketed in ice.

WHAT HO!

—By—

RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XIII.

Fate, in the form of a bus, made up Ernest Bingley's mind for him. It stopped in front of him and he swung aboard it. Whither it was bound he knew not. One of the companions of poverty is that adventure is not the exclusive prerogative of the rich.

"Where to, sir?" asked the guard. "In going wherever you're going," answered Ernest. The guard gave him an alarmed look, and a tenpenny ticket, and scuttled away.

At the end of the run Ernest got off. Confronting him was a massive structure, which, a bobby informed him, was the Bank of England. Ernest was wistfully inspecting the exterior of this monument to Mammon, when Sir Peter Tyler, a most substantial and resplendent figure, issued forth.

"Bingley, by Jove!" he exclaimed. "What a bit of luck. Glad to see you."

"How do you do, Sir Peter," said Ernest.

"Splendidly, thanks. I rather thought you'd be in town to-day."

"You did?" said a surprised Ernest.

"One finds bees where honey is," said Sir Peter, and winked. "Shall we go in my car or yours?"

"Yours," said Ernest.

A free ride was a free ride, and Sir Peter was Sir Peter.

They entered a limousine like a fancy beast.

"Club, Willets," ordered the financier.

They were ferried through the Strand's traffic and delivered at the door of a marble temple in Pall Mall.

Sir Peter talked of his golf game, en route. Ernest lolled on the cushions and listened though he did not know a brassie from a birdie.

In the impressive lobby of the club a door-man rigged out in the dress uniform of a field marshal in Albanian dragoons, said:

"They are waiting for you in the private dining room on the third floor, Sir Peter."

"Good," said Sir Peter. Then, to Ernest, as they rose in the lift, "Too bad our friend cannot be with us. Passport trouble, I believe."

This was so much pure Erse to Ernest.

But he had no chance to ask questions because things began to happen, and happen fast.

Sir Peter steered him into a room where three men were smoking and drinking coffee as if they were holding a wake over the remains of a luncheon. They were men in their middle years, well-turned-out, important looking men.

They greeted Sir Peter as if he were an old acquaintance.

"Permit me to introduce Mr. Ernest Bingley, from America," said Sir Peter.

"You've heard me speak of him, I think. Mr. Bingley, this is Dr. Hendrik Van Tromp—the Dutch group, you know."

Dr. Van Tromp, who looked like a Dutch group, having a figure like a

pile of bolsters, made a quasi-military salute.

"Mr. Miles Silver,"

Mr. Silver, who looked as if he should have been called Mr. Leather for he was tanned as a saddle, and looked as tough as a check-rein, said he was honored.

"And Sir Mark Newsome."

Sir Mark, whose spike of ebony board and anthracite eyes suggested a hypnotist, said,

"Most awfully glad to meet you at last, Mr. Bingley."

Ernest made suitable civil sounds, and waited.

The four men, he was aware, were scrutinizing him closely. The thought struck Ernest that this might be a commission of alienists assigned to ascertain if his being at large constituted a threat to the peace of the kingdom. He crossed his legs and made ready to have his knee-jerk tested.

Sir Peter addressed the meeting.

"Gentlemen," he said, "I suggest we cut this short. I've a pressing engagement, and when I tell you that it involves a niblick and a caddy, you will see why we should waste no time."

"Also, I half a golf game," said Dr. Van Tromp.

"And I," said Miles Silver.

"Booked to fly to Paris this afternoon myself," said Sir Mark Newsome.

"Let's get down to it, then," said Sir Peter.

Ernest thought it rather cool of them to run him through the hoop in a hurry so they could get away this afternoon myself, said Sir Mark Newsome.

"Let's get down to it, then," said Sir Peter.

Every 10c Packet of

WILSON'S FLY PADS

WILL KILL MORE FLIES THAN SEVERAL DOLLARS WORTH OF ANY OTHER FLY KILLER

10c WHY PAY MORE

Best of all fly killers. Clean, quick, sure, cheap. Ask your Druggist, Grocer or General Store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

"You win, Mr. Bingley," Sir Peter said, and shook his hand. "You've made no mistake, believe me."

The others also shook Ernest's hand, and they did not seem much out of hand over their defeat. He tucked his cloak of silence tighter about him and waited for the prize.

"I must dash along now," Sir Peter said. "Sorry to seem so cavalier, but golf is golf, what?"

Ernest nodded, cheered by the thought that he was about to escape with his nine shillings and his pocket of pudding intact. He sensed now that this was no innocent game, but some complicated, mysterious commercial maneuver in which they had made him, for reasons known to them, a pawn.

The four important looking men were filing out of the room and Ernest was glancing out with them, when their exodus was stopped by a man who burst into the room as if his shirt-tails were on fire.

It was Hubert Punder and to say Mr. Punder was not is to say that molten lava is like chocolate ice cream. Mr. Punder generated heat in every direction.

"Hah!" he snorted. "Hah!"

"Why, Punder?" exclaimed Sir Peter. "What do you mean by breaking into a private meeting and going 'Hah!' at us?"

"Private meeting? Hah! Private swindle!" bellowed Punder.

"Watch your words, Punder," snapped out Sir Peter.

"I'd like to know what's happened here," Punder said.

"Ask Mr. Bingley."

"Hah!" said Punder, turning a venomous glare on Ernest. "Have you closed with these wolves?"

"He has," said Sir Peter, "and a little less of that wolf talk, if you don't mind."

"How much?" growled Punder.

"Sir Mark answered for Ernest."

"Five," he said.

"Hah!" It was an outraged "Hah!"

"If 'Hah!' is all you have to say, we'll adjourn the meeting," said Sir Peter.

"No, you won't," said Punder. "I got plenty to say. I know your little game. I got spies, too. Trying to juggle me out of P.P.P., hey?"

"I was not aware you wanted P.P.P.," averred Sir Peter.

"You thought nobody wanted it," said Punder. "You knew that without reorganization and a lot of fresh capital it was going on the rocks—so you and these three beauties

baited your hooks—and went fishing. Well, you caught a fine flounder, I must say."

It was entirely clear to Ernest that he was the flounder.

(To Be Continued)

Things We Value

Are Those Which Have Cost Many Sacrifices To Attain

It seems to be a favorite form of advertising to urge that a certain article can be paid for without some pet luxury. How often we read that a set of books can be purchased for the price of two good cigars a day; that a bicycle can be paid for in the saving of car tickets.

The idea is to appeal to the economic impulse that every man has more or less in his make-up.

And what articles are prized more than those for which it is necessary to make some sacrifice? The husband and wife who have saved for a home little by little, and who have found it necessary to drop pleasures and extras that they had been accustomed to, will prize the place much more than if some rich aunt had died and willed them the property.

The young man who saves his first hundred dollars from his earnings will never forget the day when he saw three figures on the sunny side of his bank book.

When advertisers appeal to that instinct in human nature, they are on legitimate and safe ground. The things we value most highly in life are the ones that have cost something to attain.—Guelph Mercury.

Write Long Letters

Laborers On Malay Estates Use Special Lightweight Paper

Native Indian laborers working on estates in Malay write such long letters home that a special lightweight paper has had to be manufactured for them.

Need for such paper was caused by the introduction of the Empire air mail system. The estate workers did not fully understand the weight restrictions and merely continued to send page upon page home to India, where their relations had to pay additional postage. The relations objected.

Estate employers solved the problem for their workmen. They ordered from London large quantities of a specially made Binsay paper, which they distributed free among the laborers.

And since 11 sheets of this paper can be crammed into an envelope without going over the half-ounce-for-a-penny-halfpenny limit, the Indian workers in Malay can now get ahead with their writing. But even they are probably not as grateful as their wives and parents back in India.

During the many months of its run in the United States, a certain terrifying motion picture caused an average of 28 persons a week to faint or go into hysterical collapse.

Although the stratosphere is only about 10 miles above the earth, and less as we travel toward the poles, an aeroplane must travel a much longer route to reach it.

Scientists now estimate the age of the ocean at from 500,000,000 to 700,000,000 years.

BUY an extra package and TRY the cooking recipe

There's a fascinating recipe on every box! You'll be surprised how delicious Christie's crisp, wholesome Graham Wafers are, made into light, flaky biscuits and other tempting, new things. It's quite a bonus idea, too... always have an extra box ready.

Christie's Biscuits

"There's a Christie Biscuit for every taste"

The British Navy

320,000 Tons Of Warships Now Under Construction

Great Britain, strengthening her vast navy in its greatest peace-time expansion, has 320,000 tons of warships under construction at dockyards and private yards, including five battleships, 17 cruisers, 19 submarines, 39 destroyers and numerous smaller craft.

The admiralty has launched a three-point plan which, it believes, would keep principal trade routes to this country open in any emergency.

In a speech at Liverpool Geoffrey Shakespeare, parliamentary secretary to the admiralty, told an audience the naval called for:

Special naval convoys for main trade routes;

Conversion of old cruisers into anti-aircraft vessels;

Strengthening the navy's destroyer arm.

The admiralty, he said, believed that on the outbreak of any hostilities it could keep trade routes open and protect shipping bound for the United Kingdom with food and raw materials by a method of routing, convoy and escort.

The secretary attacked critics who claimed strength in the air was a more vital factor in safety than strength at sea. He said experience in recent years had shown that air power by itself is not likely to win a war.

"Airplanes are fast but they are not self-contained, and it may take weeks and months for the necessary equipment, stores, ammunition and ground staffs to be taken to the Indian overseas; whereas ships are self-contained and can go anywhere and stay anywhere," he said.

Earth Is To Blame

Astronomer Says Moon Has Jumped Its Beaten Track

The moon, Astronomer Harold Spencer Jones said, has jumped its track. "And it's all the earth's fault," the astronomer told a meeting of the Royal Observatory of Greenwich.

The moon's course is plotted by the earth's time and the earth's time is reckoned by its rotation. Mr. Jones explained. Somewhere an unknown gigantic brake has suddenly been clamped on the spinning world, slowing it down, he said.

Dr. Martin Davidson, president of the British astronomical association, estimated this slowing down process was going on at the rate of about 1-100th second every century.

At present, he said, the moon is about six seconds off time off its beaten track.

Dependable Mail Carrier

Postal authorities of North Turner, Maine, know that the mail will go through when Mrs. Hazen E. McAlister, mother of five children, sets out daily on a 14-mile round trip rural free delivery route. For five years she has delivered the mail in storm and flood without missing one day.

Bobby (short of money): "S'ay, Dad, how you any work you'd like me to do?"

Father (taken by surprise): "Why—no—but—er—"

Bobby: "Then how about putting me on relief."

It took Walter Hunt of New York just three hours to think up the safety pin, make a patent right for it and dispose of his patent rights for \$400. But he'd have made a fortune if he hadn't sold out.

A Babylonian king of the eighth century B.C. had a herb garden in which he grew about 70 kinds of plants.

Poland, we read, is joining in the search for a peace formula. How about the Golden Rule?

Fought Chinese Bandits

Missionary Found Athletic Training Stood Him In Good Stead

Stirring tale of battles with Chinese bandits was related by Rev. Father J. J. McDonald, who was in Toronto on his way to Windsor, N.S., on furlough after eight years as a missionary in Lichiu, Chekiang province.

Father McDonald is the son of Windsor's chief of police and a graduate of St. Francis Xavier, where he played football and boxed.

Father McDonald's athletic experience came in handy at his mission post. He said that the father of a little girl at Lichiu said her to another old man for \$200 and she was to become the wife of the son of the purchaser, but when she grew up she didn't want to marry the man. Since she had become a Christian, Father McDonald advised her not to go through with the bargain that started the trouble.

Brigands turned up at the home of the girl's father, where the missionary was staying at the time, and Father McDonald had an idea they were after himself. "No doubt that's the reason I put up such a battle," he said.

The missionary led other men of the household in a hand-to-hand struggle with the invaders and after the fracas was over the bandits fled to the hills, carrying their wounded.

German Warfare

Says Noxious Germs Will Not Be Used In Future Wars

Noxious germs will not be scattered from the skies in a future war, according to Wing-Commander E. J. Hodson, inspector-general of air raid precautions. Bacteriological warfare is impossible, he told a meeting of sanitary inspectors in London. It was not feasible to drop "bugs" from the air.

"They do not take very kindly to being compressed and thrown about," said Commander Hodson. "It would be necessary to introduce the 'bug' into the system, and short of supplying each of them with a small knife to make a hole when he arrived, it could not be done."

Overlooked The Soup

Famous Pianist's Chef Wanted All Of His Food Fished

Paderewski's chef always accompanied him on his concert tours, and like all good cooks he thrived on praise. Paderewski saw that he got it, too. Once, after a special luncheon had been served to a party of the pianist's friends, Paderewski sent his compliments to the chef with a message that the fish was marvelous, the entree superb, and the dessert unsurpassable. Back came the messenger, saying:

"The chef says that the soup was good, too."

In the presence of moisture, cracks in concrete heal so lightly that the concrete may be stronger than before.

A motor for bicycles to be connected directly to the front sprocket has been patented.

CHATTER.

Rev. Hunt was a business visitor
in the city last weekend.

W. R. King, M.L.A. for the
Cochrane Constituency, was a
visitor in town Tuesday.

Sinclair Boyd, of the staff of the
local Branch of the Canadian Bank
of Commerce, is relieving at the
High River branch.

A. E. Edlund was a city visitor
last Friday.

Miss Alice Collicutt, of Olds
spnt the weekend at her home.

Ben McLeod, of Turner Valley
spent the weekend at his home here.

Mrs. Pete Knight, of Fort Worth,
Texas, is visiting friends in and
around Crossfield.

George McDonald gets the first
suit in the George Lim suit-pur-
chasing plan.

Miss Helen Sharp, of the Marback
farm, Carstairs, was a weekend visit-
or at her parental home in town.

Ronnie McFadyen, of Calgary
was a weekend visitor at the home
of his parents here.

Len Pullan, of Calgary, was a
Sunday visitor at the H. R. Ballam
home.

Bill McLeod is recuperating in the
Innisfail General Hospital after an
Appendix operation.

Mrs. S. H. McClelland, of Calgary
was a visitor at the Dr. and Mrs.
D. W. Whillans home this week.

Mr. and Mrs. Montgomery, of
Calgary, were visitors in town
Sunday.

Mr. and Mrs. Duncan and family
of Calgary, are visiting at the home
of Mrs. Duncan's parents, Mr. and
Mrs. J. Fike.

Mr. and Mrs. A. Tesley, Mr. and
Mrs. J. Davidson, of Calgary, were
Sunday visitors at the home of Mr.
and Mrs. D. H. McFadyen.

Mrs. Dalton and three children
of Calgary, visited at the home of
former's parents, Mr. and Mrs. F.
Hopper.

The Misses Jean Collicutt and
Kathleen Mair are attending the
Rose Carnival at Seattle, Portland
and Vancouver. They will return
in about a month.

Miss Anne Cameron left for
Banff last weekend, where she has
accepted a position for the summer
months.

Mr. J. Jarman, of Calgary, and
former R.C.M.P. at Crossfield, was
a visitor in town on Wednesday.

Inspector Birch, of the R.C.M.P.,
who is at present relieving in Cal-
gary, and who was once stationed
in Crossfield, was a visitor in town
last weekend.

Mr. and Mrs. W. F. Crannell
and Mr. and Mrs. F. W. Jones of
San Diego California are visiting
at the home of Mr. and Mrs. O.
E. Jones.

Rev. R. H. Standerwick, of Cal-
gary, will take charge of the services
at the local Baptist church the next
two Sundays, June 19th and 26th,
during the absence of the Rev.
Pickford.

Do you like Strawberries and
cream? Then come to the home
of Rev. and Mrs. Hunt on Sat-
urday June 18, when the Inverles
Ladies Aid will serve you with a
dainty lunch from 3 to 6 p.m. Come
and aid a good cause.

Tennis Tournament Held Over Weekend

A very successful Mixed Doubles
Tennis Tournament was held over
the week-end, in which a large
number of the local enthusiasts
participated. The Primary event
was won by Miss Jean Carmichael
and G. J. Dawson while Miss Nora
Fleming and Mr. A. D. Stevens
took the honors in the consolation.
The Committee wish to thank the
players for their co-operation in
keeping the matches running on
schedule.

PRECIPITATION REPORT.

Taking into account the precipi-
tation that occurred last autumn
during the months of August, Sep-
tember, and October, and the rain-
which have fallen this year from
April 1st to June 4th inclusive,
and weighing of wheat acreage, the
moisture conditions of Alberta, on
June 4th was 98 pc. of the normal
as compared with 100 pc. for the
previous week, and 104 pc. for the
week before that.

For Saskatchewan, on June 4th,
the condition was 84pc. as compar-
ed with 95pc. for the previous week
and 80pc. for the week before that.

For Manitoba, on June 4th, the
condition was 86pc. as compared
with 88pc. for the previous week
and 91pc. for the week before that.

Taking the three Prairie Prov-
inces as a unit, the weighted aver-
age on June 4th was 89pc. of the
normal, as compared with 96pc. at
the same time last week, 92pc. for
the week before that and 72pc. on
June 4th last year.

Extend Highway Signs In Alberta

Proper signing of Alberta high-
ways is to be extended this year,
according to officials of the Edmon-
ton branch of the Alberta Motor
Association.

This need was given special at-
tention last year by the Calgary
branch of the A.M.A. which made
a full report to the annual meeting
of the organization last December.
During last year the adoption of
a proper, standard sign was discus-
sed with the provincial Public
Works Department.

Recently it was announced that
the Edmonton branch has under-
taken to place signs on the high-
ways running north and south east
of the city to the Saskatchewan
border, at the points where they
intersect the east and west highway.
Thus, visitors who wish to turn off
at some point on the main highway
to take a different route, will have
no difficulty.

With the construction of new
roads being extended and prospects
of tourist business showing a
material increase, both motor club
and government officials apparently
are alive to the necessity of having
the highways properly marked.

Around Field and Barn.

By E.M.C.

I was shown a one way plow or
disc made out of an old disc harrow,
weighed down with rock it was
doing good work, the greatest diffi-
culty was to get the right draft but
this was overcome and another is to
be made for a rear-in-throw.

The gray leaf Tanoy Mustard
that is growing so thickly around
many hog lots, pastures, yards and
fences, this year will need watering
it is not a bad weed in well formed
crop land, but will soon ruin a good
pasture hog lot, or wind break if
allowed to go to seed. It is a nativ-
biennial, seeding early, it likes to
go places in its old age and is serious
in some parts of the province, be
sure and not sorry.

And then there is the fellow with
the tractor who likes to drive it on
the soft road and make a pretty
pattern with the lugs, it makes the
road so nice to drive over with a
wagon or car, thank you very much.
